

## KZEN, SAP collaborate to develop HR software

KZEN Solutions Bhd (KZEN) has teamed up with SAP Malaysia Sdn Bhd to develop the KZEN HR One — a new human resource (HR) software.

KZEN executive director Chow Wei Hoon said this software is a solution tailored for small and medium-scale enterprises (SMEs).

The software is user-friendly, practical and fully equipped with the latest and most up-to-date HR functionalities,

he added.

"This is essential in keeping up with the latest technology of the fast-paced world of today," he said in a statement.

The software is pliable yet robust, giving greater flexibility in systems upgrade.

"Moreover, it's created at an affordable price to meet the needs of SMEs", Chow added.

KZEN is also optimistic that the software will allow more companies to operate and

manage time in a more effectively and systematic manner.

Meanwhile, SAP Malaysia country channel sales manager of channels and small enterprise, Alwyn David, said the new software comes with enhanced and improved features compared with the SAP Business One HR Module.

The software can help users to save time and effort, but more importantly it is cost efficient.

The KZEN HR One also has comprehensive and extensive HR features such as those for personnel, leave and training administration as well as payroll and performance management.

"KZEN and SAP look forward to seeing more Malaysian companies adopt the new HR solution to achieve globally competitive standards in HR software development," David added.
